# Bilaga D – Inlärningstabeller

Denna bilaga beskriver de engelska inlärningstabellerna. Bilagan är endast tillgänglig på engelska.

The BrailleNote Touch Plus introduces new braille tables to which are designed to teach braille in easy steps. The learning tables are also found within Duxbury system and is a great introduction to becoming proficient at contracted braille. Each learning table has a specific learning structure with several stages or series to select from. Each series or stage will introduce new word signs, contractions, punctuation, etc. and will only show the earlier tables necessary for the braille contraction that is being learned or known.

The Learning tables can be found amongst all English braille tables. When configuring your language profile and selecting the preferred literacy braille table you can select the relevant learning table followed by the current series you are undertaking,

Details of each course can be viewed below, which is shared from Duxbury systems.

## **NLS I.M.BT. (UEB 2015)**

This series of "select contractions" steps is based upon the "Instruction Manual for Braille Transcribers," (UEB, 2015) published by the National Library Service for the Blind and Physically Handicapped of the Library of Congress. The lesson numbers associated with the steps correspond to that document; the contractions are introduced as follows:

## **TSBVI Clusters (BANA)**

The second graduated contractions series is based upon the "Clusters" defined and used by the Texas School for the Blind and Visually Impaired.

The complete TSBVI "Clusters" sequence is listed below. Note that Cluster 1 is equivalent to grade 1, and Clusters 54 and above are equivalent to grade 2.

Those clusters that are omitted in the menu are marked with an asterisk (\*).

Apart from Cluster 54, the reason that the others are omitted is that they introduce no new contractions nor the letter sign:

## **Braille in Easy Steps (BAUK/UKAAF)**

by John Lorimer (revised by Claire Wilson, 2017).

### **Duxbury Levels**

Because three letters are not introduced until Book 7 (j, q, z), but all other letters have been learned by the end of Book 4, this would have to be the first Duxbury level, with the three missing letters taught specially if they occur. So, the Duxbury levels would look like this:

(note: letters j, q and z may occur which are not formally taught until Book 7)

Pre-braille and tracking skills

The alphabet (j, q and z not formally introduced, but may crop up)

## **Take Off Reading Scheme (UEB)**

Takeoff - A second stage scheme for young learners to develop phonic skills, knowledge of braille contractions and word signs, in 12 stages TC21413.

Takeoff teachers handbook – This is currently available from RNIB. A Teachers handbook to accompany Takeoff TC21415P.

Take Off is divided into 12 levels, and a group of grade 2 braille signs is taught at each level.

From the start of the Take Off series all of the alphabet and alphabetic wordsigns with the exception of K for knowledge are used. In addition, the shortforms good and little are also used. Punctuation used from the outset are full stop, capital symbol indicator and question mark. The numeric indicator is also used as this has been previously introduced in Hands On. The following lists the signs and shortforms as they are introduced by series.

The Take off Series is available from RNIB product Code TC21413

### **Fingerprint - Order of Sign Introduction**

The "select contractions" step series is based upon the "Fingerprint" course originally developed in 1993 by the late Nigel Berry, Lecturer in Braille at the Royal National College for the Blind, Hereford, UK, and now published by the RNIB.

Please note that the tables in DBT only enable you to produce additional braille as the student progresses. They are not intended as a substitute for the actual course material itself. The following is RNIB's Product reference.

Fingerprint braille course (UEB) - Product code: TC21439

# **Bilaga E – Läs tryckt text i KNFB Reader (endast i enheter köpta före 2022)**

Appen KNFB Reader gör massor av olika tryckta dokument tillgängliga blott några sekunder efter att man har tagit en bild. Det är ett utmärkt sätt att läsa böcker, tidningar, menyer, tabeller samt nästan alla typer av dokument utskrivna av en dator.

Notera att kvalitén på teckenigenkänning beror på många faktorer såsom belysning, textkvalitén, typsnitt, färger, etc. Bästa resultaten når man med god belysning och standarddokument med svar text på vit bakgrund.

Observera: Appen KNFB Reader är en app som har optimerats för användning i BrailleNote Touch men den finns även som en app som kostar pengar i Google Play Store. Alla uppdateringar till BrailleNote Touch-versionen av KNFB Reader kommer att distribueras via HumanWare i samarbete med KNFB technologies. Dessa uppdateringar kommer inte alltid samtidigt som uppdateringarna till Google Play Store-versionen av appen. Den fullständiga användarmanualen för KNFB Reader är allmän och till för alla typer av enheter. Det är till exempel inte rekommenderat att placera BrailleNote Touch på ett stativ som inte är skräddarsytt för enheten. Detta alternativ är tillgänglig för vissa smartphones där stativ har tillverkats specifikt för detta ändamål.

## **Starta KNFB Reader**

Starta KNFB Reader via huvudmenyn och bokstaven K för att navigera till KNFB Reader. Tryck sedan Enter eller en av cursor routing-knapparna.

## **Ta en bild, läsa och spara dokument**

När KNFB Reader har startats visas skärmen för bildtagning. Med skärmen uppåt placerar man BrailleNote Touch ovanpå och i samma längdriktning som dokumentet som ska identifieras. Lyft sedan enheten rakt uppåt ungefär 8 till 15 cm från dokumentet.

Ta en bild genom att ha fokus på knappen "Ta en bild" och tryck på en cursor routing-knapp. Alternativt kan man trycka på Slutarknappen på höger kanten av enheten. Ett kameraljud kommer att höras. För att få bästa möjliga resultat bör man hålla BrailleNote Touch så still som möjligt.

När texten är identifierad kommer den att visas i punktskrift på displayen. Navigera med vänster och höger tumknapp eller tryck Mellanslag + punkt 1 eller punkt 4 för att flytta rad för rad genom det identifierade innehållet. Man kan spara dokument genom att navigera till samt aktivera knappen Spara dokument. Eller använda navigering via första bokstaven och trycka S.

För att komma åt den fullständiga användarmanualen för KNFB Reader, välj Filutforskaren och tryck Enter eller en cursor routing-knapp. Välj Fullständig användarmanual och tryck Enter eller en cursor routing-knapp. För att avsluta användarmanualen, tryck Tillbaka.

# Bilaga F – Säkerhet och underhåll

## Allmän skötsel och rengöring

Undvik drycker i närheten av BrailleNote Touch. Torka emellanåt av ytorna på enheten med en varm fuktig tygbit. Vrid ur tygbiten ordentligt innan så att den bara är lätt fuktig. Punktdisplayen kan rengöras med lätt fuktad trasa och milda rengöringsmedel. Använd inte frätande eller slipande rengöringsmedel. Alkoholbasera desinfektionsmedel kan användas.

## Skötsel av punktdisplay

Varje cell på punktdisplayen har åtta pinnar. För varje pinne finns en speciell kristall som lyfter pinnen när det ska visas en punkt samt släpper tillbaka den när det ej ska visas en punkt. Pinnarna måste kunna röra sig fritt. Vid vanlig användning är det oundvikligt att smuts samlas på punktdisplayen runt pinnarna samt cursor routing-knapparna. För att förhindra att pinnarna fastnar bör punktdisplayen rengöras med jämnan mellanrum. Att rengöra punktdisplayen är inte enkelt. Vi rekommenderar att BrailleNote Touch skickas till en auktoriserad service-verkstad var tolfte månad för rengöring av punktdisplayen.

Att hålla händerna rena när man använder enheten är ett bra sätt att minimera problemen med smuts i punktcellerna. Vi rekommenderar att man torkar av ytan en gång i veckan med en fuktig tygbit. Tygbiten måste vara väl urvriden så att allt överskottsvatten är borta. Använd endast varmvatten på tygbiten.
